## FRL Combinations

Wilkerson C series Combination FRLs integrate the excellent features of the FR and L series, in a stable compact footprint.

Available in C08, C18 and C28 series and with port sizes 1/8" to 1".

All C series can be assembled in modular or conventional pipe ripples modes and have a wide range of accessories such as diverter blocks, exhaust valves, pipe adaptor set and low profile pressure gauges to suit.

All Wilkerson FRL Combinations feature:

- \* Installation and flexibility and simple assembly through a simple patented modular joiner system, quick changing and service without disturbing permanent piping.
- \* Compact size with high performance.
- \* All the features and benefits of individual Wilkerson components.
