## Filters

Wilkerson F series regulators are highly efficient at removing dirt, rust, pipe scab and other particulate contaminants down to 5 microns in size and are over 97% efficient in separating liquid water and oils with low pressure drops at each rated flow.

Available in 4 separate series F08, F18, F28 and F39, and in 6 port sizes 1/8" to 1".

All Wilkerson filters feature:

- \* Whirl flow baffle ensuring maximum separation of dirt and water from air.
- \* 5 micron filter element as standard.
- \* Sintered depth type element for high dirt holding capacity.
- \* Quick release bayonet type bowl mount for easy disassembly.
- \* Manual drain with pipe away.
- \* Can be installed modularly or conventionally with hard piping.
