

SERDI HVR 90

Excellent Grinding Accuracy

The SERDI HVR 90 is a **high precision** horizontal valve refacer for valve stems from 0.16"/4mm to 0.55"/14mm. **Variable speed** valve rotation.

- Horizontal valve rotation through fire face.
- Valve rotation speed according to valve head diameter from 0 to 750 r.p.m.
- Valve characteristics:
 - Ø valve stem: 4 - 14 mm
 - Ø valve head: up to 90 mm
 - Valve seat angles: 12° - 47°
- Grinding wheel (width 15 mm) balanced and driven by a motorspindle.
- Built-in grinding wheel dresser.
- Stem end grinding attachment.
- Simple and fast installation and adjustments.
- Unique ergonomic design.
