

SERDI SPT 1501

Efficiency and Reliability

The SERDI SPT 1501 is an easy and **efficient pressure test** of cylinder head and cylinder block coolant circuits. Using compressed air and immersion in hot water.

- Heat insulated stainless steel tank.
- Heating elements: 2 changeover 4500 Watts elements.
- Water level control.
- Low voltage control circuit, 24 V.
- 360° electric powered roll-over fixture for easy inspection of all faces.
- Hydraulic cradle lift for easy positioning of the work piece.
- Adjustable electric thermostat.
- Heating cycle programmer (daily or weekly).
- Quick and easy clamping system allowing tests at a pressure of 1 to 5 bars.
- Built-in lighting for easy control.
