

# Specialised Control - BXX Series

## Specialised Control - BXX Series - Brass Body

The Goyen BXX 2 way normally open series are forged brass bodied pneumatic operated fluid control valves.

BXX series operate by applying air pressure to the top control port and can be remotely operated by a Q3M 3 way pilot solenoid valve or other operating device.

Equipped with inline connections the BXX series is available in 5 port sizes 1/4" through to 1" Rc.

A selection of seal and diaphragm materials are available to meet the needs of your fluid application.

Applications for this series include the control of high viscosity fluids such as bunker fuel.
